

# 3 STEPS

## TO IMPROVE YOUR PRACTICE & INCREASE GROWTH

The process of care to provide clinical excellence is imperative! From assessment to implementation, we give you the steps for success. We will get your team up-to-date on the latest innovative clinical equipment and instrumentation essentials.

### 1 CREATE AWARENESS

- Educate your entire team.
- Identify patients that can benefit from treatment.
- Reduced missed opportunities for treatment your patients deserve.
- Increase production and collections.

### 2 IDENTIFY DISEASE

- Implement clinical protocol.
- Adopt effective treatment planning.
- Stop the bloody prophylaxis battle.
- Implement ORAL DNA Salivary Diagnostics.

### 3 UTILIZE PATIENT SPECIFIC CARE

- Implement ORAL DNA protocols.
- Begin a referral program with medical providers.
- Provide comprehensive care.

We will help you develop and implement a periodontal protocol specifically for your practice that outlines and identifies these steps for success. Customizing these essentials will provide your patients with better comprehensive care while your practice maximizes case acceptance and profitability.
