

**Registered Dental Hygienists are essential members of collaborative care, ensuring comprehensive, patient-centered health solutions.**

- NNHH is a 501c (3) professional support organization for Registered Dental Hygienists who have a mindset of oral-systemic wellness over dental health alone.
- We offer high-level certificate programs proven to boost an RDH's confidence educating patients and providers on oral systemic health, and working collaboratively.
- Our certificate programs are comprehensive, unbiased, and research-based. They are fully online and self-paced, requiring a capstone project and passing of a final assessment to earn a certificate of completion and credential.
- Once a student receives their certificate and credential, they hold it for life like a degree. They may add the credential after their name if desired.
- The Oral Systemic Educator Certificate program is the first in the world to meet the standards of both ANSI Accreditation for Certificate Programs (ASTM E2659-18) and AGD PACE.
- MANY of NNHHs certificate holders have created or secured new positions as a result of completing our programs. Others have expanded their existing roles.
